

SLED/HIKING CART (SOLD SEPARATELY)

 <p>1</p>	 <p>2</p>	 <p>3</p>	 <p>4</p>
<p>Press and hold the black push button on the ski bolt and insert the bolt through the hole in the ski bracket.</p>	<p>Press and hold the black push button as you insert the bolt in the cart.</p>	<p>Release the black push button when the bolt is fully inserted, the ski bracket should now be firmly attached to the cart.</p>	<p>Pull on the ski bracket to ensure the bracket is securely attached to the cart. Repeat on the other side.</p>
 <p>5</p>	 <p>6</p>	 <p>7</p>	 <p>8</p>
<p>PULL ARMS: Insert the bent tube in one of the openings in the front. Repeat the procedure on the opposite side.</p>	<p>Insert the straight tube in the bent one. Repeat the procedure on the opposite side.</p>	<p>Choose from the 3 different lengths as required. When used as a sled, the longest length is recommended.</p>	<p>Lock the tube with the included Velcro pin. Repeat the procedure on the opposite side.</p>
 <p>9</p>	 <p>10</p>	 <p>11</p>	 <p>12</p>
<p>Insert the nylon end piece with a hook in the straight tube. Repeat on the other side.</p>	<p>Lock it with the included Velcro pin. Repeat on the other side.</p>	<p>Wear the harness with the logo on the back. Adjust the length of the shoulder straps, both front and back, until the belt is on the hips.</p>	<p>Attach the pull arm to the harness by attaching the carabine hook in the O-ring on the hip belt. Repeat on the other side.</p>

 <p>13</p>	 <p>14</p>	 <p>15</p>	 <p>16</p>
<p>Straps for children's skis/ski poles</p>	<p>There are 4 ventilation holes in the edge of the bottom casing. Choose two and thread the straps through them.</p>	<p>The straps are now attached as shown in the picture.</p>	 <p>Reduce snow friction by applying glide wax on the bottom of the skis. You can use liquid glide wax which is easier to apply. Polish afterwards with cork.</p>

 **WARNING**

Straps for skis/ski poles must not be used with wheels.
